DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a sensor for determining flow rate, classified in class 73, subclass 204.17.
 - II. Claims 22-27, drawn to a method of measuring flow rate, classified in class 73, subclass 204.17.
 - III. Claims 28-30, drawn to a method of measuring a flow rate of a fluid, classified in class 73, subclass 204.17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the sensor for determining the flow rate does not require the method of measuring comprising supplying a known amount of energy of the fluid; determining the ambient temperature of the fluid and measuring the time required for the stored reference value. The subcombination has separate utility such as measuring comprising supplying a known amount of energy of

the fluid; determining the ambient temperature of the fluid and measuring the time required for the stored reference value.

Because these inventions are distinct for the reasons given above and the search required for Group I, II is not required for Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to Christopher Makay on 4/18/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Response to Arguments

2. Applicant's arguments with respect to claims 1-30 have been considered but are moot in view of the new ground(s) of rejection.
